VOL. XV, NO. 26.

GREENVILLE, KY., THURSDAY, AUGUST 7, 1913.

50c. PER YEAR, IN ADVANCE

CELEBRATION IN LOUISVILLE

KENTUCKY METROPOLIS WILL COMMEMORATE INCIDENTS IN WAR OF 1812.

HUNDRED YEARS OF PEACE.

Battles Which Kentuckians Won and Massacres in Which They Suffered Will Be Reproduced in Fireworks and Shams on Land and Water.

A week's celebration, which Louisville declares will be the greatest and most spectacular in the history of the city, will be held in the Kentucky metropolis for seven days, commencing September 29, and will be the climax of a series of celebrations held in a dozen lake cities, to commemorate the sufferings and victories of American arms in the War of 1812 as well as to focus attention on the achievements of a century of peace. The crucial and decisive engagement of the War of 1812 was the battle of the Thames, fought and won on Canadian soil October 5, 1812. The series of celebrations, which will be held in America will close in Louisville, October 5, 1913, and just one hundred years from the hour that Gen. Richard M. Johnston, afterward Vice President of the United States, slew the Indian chief Tecumseh, President Woodrow Wilson will probably be addressing a crowd of 100,000 people in Louisville, the home of many of the troops who fought in the battle of the Thames.

Kentucky was assigned the closing and choice date of the celebration because of the distinguished part played by the Kentuckians in the War of 1812. Kentucky began to play her part in the generation before the war opened, when she sent Gen. George Rogers Clark and other Louisville soldiers into the hostile wilderness which they wrested from the French and Indians and out of which was afterward carved the great States of Ohio, Indiana, Illinois, Wisconsin and Michigan.

Kentucky was the last state which could have benefited from the war, inasmuch as it was brought about chiefly by the British impressment of American seamen, none of whom were Kentuckians, whereas should war prevail the unfriendly Indians on the frontier of the border states could be expected to commit atrocities from which Kentucky had already received the name "Dark and Bloody Ground." However, it was chiefly Henry Clay, in the Kentucky Congressional Declaration that forced President Madison to declare the second war with Great Britain, and Kentucky furnished forty per cent of her fighting population to go into that war, and at the close of the war of the listed dead more than eighty per cent were the names of Kentuckians. Kentucky troops to a man were massacred at the River Raisin and again at the first attack on Fort Meigs.

When the time came to man Perry's new-hewn ships, he selected Kentuckians unaccustomed to the motion of the lakes to mount into the insecure rigging and from that vantage point, with their practiced eye and unerring aim, fired down upon the British and won the battle of Lake Erie. Practically every officer and soldier in the battle of the Thames was a Kentuckian, excepting alone Gen. William Henry Harrison, who, however, held his commission as Major-General from the Kentucky legislature. The charge of the Fort Mifflin, about the briefest, most terrible and most heroic attack narrated in the annals of warfare, consisted exclusively of Kentucky soldiers when nineteen of them and their twenty horses went down to certain death. It was the Kentucky sharpshooters who are credited with having won the battle of New Orleans after the war had in reality closed.

Kentucky proposes to reproduce most of these scenes of the war of 1812 in the Louisville celebration. The battle of the Thames will be reproduced on land in Cherokee Park, topographically situated similar to the land on which was fought the battle of the Thames, and every detail of the sham battle will be as nearly historically correct as can be done. Louisville will take advantage of her magnificent river frontage in order to celebrate suitably the battle of Lake Erie. The actual battle will be depicted in a gorgeous entertainment of fireworks and all morning and all afternoon preceding the engagement there will be boat races, life saving feats and aquatic sports. A historical pageant, depicting various scenes of the war of 1812 will also include a magnificent floral parade, such as made Louisville famous a year ago, and will include civic and military parades many miles in length. Drills and exercises by 10,000 costumed school children will be held in the First Regiment Armory; a mammoth reception will be given to the descendants of Kentucky soldiers and sailors of the war of 1812, and a series of costumed balls will be given in their honor.

Exceedingly low railroad rates, probably as low as one cent per mile, from a distance of several hundred miles of Louisville, will be granted and efforts are being made to secure to other Kentucky points rates from Louisville for the week immediately following the celebration, to enable former Kentuckians who return home to visit the celebration, to visit also their old Kentucky homes.

HEALTH EXHIBIT CAR, KENTUCKY TUBERCULOSIS COMMISSION

This car has been equipped with an exhibit to instruct the public regarding the spread, cure and prevention of consumption. It will cover first the L. & N. lines in the State. Admission is free; and numerous free illustrated lectures will be given evenings in outside halls.

DISINFECT!

When the doctor tells you to disinfect after the recovery or death of a member of your household, do exactly as he tells you. He knows what is best, and you don't. For instance, you may believe that burning a little sulphur in the room will destroy the germs; as a matter of fact, it will probably not even kill the bedbugs. Formaldehyde is by far the best disinfectant for most purposes. But formaldehyde gas does not penetrate. Germs lodged in mattresses, feather beds, heavy bed clothing, books, carpets, wall paper, and similar things are not in the least affected. Everything in the room should be opened up as much as possible. Heavy blankets and similar things should be boiled for an hour. Especially after consumption, bedding, mattresses and upholstered furniture ought to be burned. After the fumigation, all the woodwork should be carefully washed with hot, soapy water and then wiped off with a cloth wet with some disinfecting solution. Then a room ought to be left unoccupied for a couple of days, if possible, with the windows wide open; for, after all, sunlight and fresh air are the best disinfectants.

Kentucky Tuberculosis Commission.

DIAGNOSIS!

If you suspect that you have consumption go at once to your physician to be diagnosed. Don't delay! Every day lost decreases the chance of cure. And go to the best physician. Even the best physicians can not immediately distinguish tuberculosis in its first stages from other troubles. Expect your physician to take a sample of your sputum, which can be examined free of charge in the laboratory of the State Board of Health. If germs of tuberculosis are found, that is absolute proof that the disease is present, even though you can see no outward signs of its inroads. If they are not found, you may nevertheless have tuberculosis; in the early stages of the disease more often than not the germs will not be found in the sputum. Expect your physician also to make a careful physical examination of the trunk of your body from the waist line to the neck. It will take him a full half hour to do it thoroughly and, if he requests it, the patient must be stripped to the waist line.

SYMPTOMS!

Not one person in fifty knows accurately the symptoms of beginning consumption. The doctor can detect some things which the layman can not; but the following signs anyone can notice. The commonest symptom is a continual cough, either a few snags of coughing each day or a little hacking cough at intervals all day long. A slight feverish condition between one and seven o'clock in the afternoon, generally about 4 o'clock, and sometimes lasting only a half hour, is another common sign. If a person has both the cough and the fever the trouble is almost surely tuberculosis, especially if combined with a steady loss of weight; a gradual loss of appetite; a feeling of being continually tired or lack of interest in life, or night sweats, the other common signs of beginning consumption. Any one of these persisting for some weeks should cause the person concern and send him to the doctor. Don't delay. Delay is dangerous! Find out what ails you! Everything can be gained and nothing can be lost by knowing whether or not your affliction is tuberculosis.

Kentucky Tuberculosis Commission.

MEDICAL BOOKS!

Probably at some time or other, a smooth book agent has tried to sell you a "doctor book." Generally it is a big, heavy volume, with the names of physicians in distant cities on the title page, and a big, heavy price set on it. The agent will tell you that by a little study of its pages, you can always tell just what ails you, just what medicines to get at the drug store, and just what doses to take. So you save all doctors' bills. If you buy the book, you put yourself among that class of fools from whom the sharpers of the world make a rich and easy thing.

MEDICINE!

Most of us place all together too much faith in medicine. Of all the hundreds of known diseases, very few can, in every instance, be cured by any single kind of medicine. Sometimes one person, suffering with a given disease, will not be affected, or may even be harmed by a medicine which has been given with good effects to another person. Most diseases are the result of self-indulgence, or carelessness, or ignorance, and nearly all the cures, where cures are possible, are provided by nature. This is especially true in the case of consumption. There are some few cases that are benefited by medicine, but no medicine can yield a cure, or even a considerable improvement, unless it co-operates with the forces of nature. There are quantities of medicine sold in the stores and advertised in every conceivable way, as cures for tuberculosis. Most of them actually injure the person who takes them; because most of them contain opiates or other harmful drugs. Every one of these "consumption cures" is planned simply to enrich the manufacturer at the expense of the most helpless people in the world. If your doctor is unable to give you medicine to cure you, don't think of passing the drug.

Kentucky Tuberculosis Commission.

VISITING NURSES!

A visiting nurse is a trained nurse with a special experience, supported by the city, or county, or some charitable organization, who devotes her time to visiting the sick, giving them advice, and such assistance or service as she can render in a short time. Of course, a visiting nurse is unable to attend cases of such highly infectious diseases as scarlet fever in the course of her regular duties. She is under the orders of the physician and is not allowed to make diagnoses. One such nurse can relieve a great deal of distress; but it is rather a harder task to prevent disease than to cure it. When, for instance, she goes to look after one case of consumption in a family, she watches the other members of the household carefully in order to see whether or not there are others just coming down with the disease. She visits patients during the period of convalescence to guard against a relapse or the catching of some other disease. She educates the families of her patients regarding what to do for the patient and how to take care of themselves so as to avoid the same disease. There are at present few visiting nurses in Kentucky. Wouldn't you like to have one in your community? Wouldn't it be worth a little of your money every month for her support?

Kentucky Tuberculosis Commission.

BATH TUBS!

Keep on friendly terms with your bath tub. It is the business of the skin to pass out to the surface of the body some of the waste products. In the process of hard manual work or violent exercises unusual large amounts of waste products are made, and the sweat carries them off with greater rapidity. The action of the breeze and the rubbing of the clothes remove some of this waste, but it can not be thoroughly done except with water. A warm bath with the use of a little soap once a week is the minimum with which the skin can do its best work. Baths can well be taken more frequently, especially if one takes a great deal of exercise. Quick baths in cold water without the use of soap tend to harden the skin and make one less liable to have colds. However, such baths do not give the skin a thorough cleansing, and ought not to be taken by very delicate, sensitive people except under the recommendation of a physician. Baths not only cleanse the skin, but they also start the blood to moving faster. It is known also that they have a marked effect on the nervous system. People who are exceedingly nervous or fatigued by properly administered baths then in any other way. For continuous mental and physical health, a bath a day is an excellent rule. Teach this to your children!

Kentucky Tuberculosis Commission.

FARM POULTRY

USE OF ELECTRICITY

Veteran Inventor of California Has New Device.

"Artificial Hen" Promises to Be Success When Power Is Abundant and Cheap—Can Be Attached to Any Incubator.

An electrical incubator has been developed by C. L. Byce of Petaluma, Cal., a veteran maker of incubators, says the Popular Electricity. The electric "artificial hen" is perhaps the most advanced product of his inventive genius and promises to be a commercial success when electrical power is abundant and cheap in the districts devoted to poultry raising.

The inventor describes his device as follows: "For several years in our

Electric Incubator.

experimental rooms and at poultry shows and fairs we have used the electric current for hatching and brooding, and many dealers have made use of a special tube in their incubators to draw the electric current from the outside. Our company was the first to use electricity for artificial brooding and hatching, and as far back as 1906 we hatched chicks in this way at the California state fair.

"The regulator controls the flow of the current so nicely that the temperature is almost perfectly even. Of course the device is practical only in places where a twenty-four hour service is maintained by the power companies and where the price of the current is not excessive. To use electricity for our incubators it is not necessary to purchase special complete outfits. The device is simple and can be attached to any of our incubators at a trifling expense. It is connected by simply screwing an ordinary electric plug into the lamp socket of any standard electric light fixture and turning on the key."

POSSIBLE REMEDY FOR ROUP

Disease Is Difficult to Cure and Affected Birds Should Be Removed to Roomy Coop.

Roup may be known from an offensive discharge from the nostrils and swelling below the eyes. The swelling in some cases entirely closes the eyes. This disease is known as roup, and is difficult to cure. Remove all the healthy fowls. Put the affected ones in a warm, dry shed or roomy coop.

Wash out the nostrils and mouth with warm water, using a small syringe to do so; then put a piece of camphor the size of a hickory nut into one quart of boiling water and hold the fowl's head over it for ten minutes; repeat three times a day. Also give one teaspoonful of cod liver oil at a dose twice a day. If the swelling closes the eyes, open them and syringe out the yellow matter and wash with warm water into which a drop of carbolic acid has been thoroughly stirred.

Fowls that are badly diseased should be killed and buried. Clean out the house, dust with fresh air-slaked lime, fork up the yard and spread over it a thick coat of fresh air-slaked lime. Add a few drops of bromide of potassium to the drinking water. Give no other water. This is the best method to use.

Best Poultry Tonics.

Fresh air, sunshine and exercise are the best poultry tonics. But fresh air does not mean drafts in the houses, nor does sunshine call for exposure to hot suns during the summer. The houses should be so constructed that fresh air can constantly be present to drive out bad odors and purify the atmosphere.

The sunshine should be able to reach every corner to destroy any germs that might be lurking in dampness. The fowls should exercise by scratching that a good circulation of the blood may be stimulated. The above are the three best medicines in the poultry doctor's store.

Follow Directions.

It is better to follow closely the directions that accompany each incubator.

CLEANING TIME

As filth flies before the broom, so do disease germs, effete and impure matter and foul humors in the blood fly before

ELECTRIC BRAND BITTERS

They can't stand against this matchless broom of the blood. Out they go, along with the troubles they cause, such as pimples, boils, sores, eczema, salt-rheum, malaria, rheumatism and kidney disorders. It makes a clean sweep. It cures quickly and cures to stay. It gives glorious health and vigor to the weak, sickly and run-down.

And For Three Summers Mrs. Vincent Was Unable to Attend to Any of Her Housework.

Pleasant Hill, N. C.—I suffered for three summers," writes Mrs. Walter Vincent, of this town, "and the third and last time, was my worst.

I had dreadful nervous headaches and prostration, and was scarcely able to walk about. Could not do any of my housework.

I also had dreadful pains in my back and sides and when one of those weak, sinking spells would come on me, I would have to give up and lie down, until it wore off.

I was certainly in a dreadful state of health, when I finally decided to try Cardui, the woman's tonic, and I finally

believe I would have died if I hadn't taken it.

After I began taking Cardui, I was greatly helped, and all three bottles relieved me entirely.

I fattened up, and grew so much stronger in three months, I felt like another person altogether."

Cardui is purely vegetable and gentle-acting. Its ingredients have a mild, tonic effect, on the womanly constitution.

Cardui makes for increased strength, improves the appetite, tones up the nervous system, and helps to make pale, sallow cheeks, fresh and rosy.

Cardui has helped more than a million weak women, during the past 50 years. It will surely do for you, what it has done for them. Try Cardui today.

FIGHTING the banana trust by imposing a duty on the fruit for consumers to pay strikes one as tariff reform gone crazy with the heat.

At Mrs. Fish's ball the women wore \$15,000,000 worth of diamonds. They wore other things also, but not enough to obscure the dazzle.

NEWLY appointed members of Chicago's police force have such names as Marjorie, Lulu, Clara, Alice and Marie. Wrongdoers may well tremble lest in the presence of these vigilant guardians of the public they commit some horrid breach of etiquette.

THE National Association for the study and prevention of Tuberculosis warns the public that no less than five hundred fraudulent "cures" for consumption have found victims in this country within the past few years, at a profit of fully \$50,000,000 to the exploiters. The association makes it plain that no specific cure for tuberculosis has been discovered, except the well-tried method of fresh air, rest, and good food.

MRS. CORA WILSON STEWART, originator of the "moult schools" in Kentucky, has taught more than a thousand illiterate adults to read and write inside of two years. She began her campaign in September 1911, with the result that every school in Rowan county now conducts classes every moult night of the year, excepting Sundays. The pupils range from 6 years of age to well along in the 80's. In fact, a woman of 86 was among Mrs. Stewart's first night pupils. The work thus begun has spread to eight other counties and bids fair to wipe out illiteracy in the Kentucky mountain tains.

The Value of Birds to the Farmer.

Prof. W. T. Hornaday, director of the New York Zoological Park, says that if birds were as numerous to-day as they were sixty years ago, it would mean a saving of many million dollars to American farmers. The slaughter of migratory birds is surely followed by the increase of destructive insects. Among the best of the farmer's bird friends are the woodpeckers, especially the red-headed members of the species.

In proof, one careful observer says: "A pair of them nested in a cottonwood-tree near my uncle's orchard one year. One day I watched them through a pair of opera-glasses. The young birds were about half grown. The parents made ninety-six trips in one hour, each time with a worm. It is safe to say they saved ninety-six apples in that hour—a lot worth, say, one dollar. If the birds worked ten hours a day, they were worth ten dollars to my uncle, or, in the three weeks the birds were in the nest, \$300. Can a farmer afford to kill a woodpecker?"

Roark's—conts.

CITY ORDINANCES.

An Ordinance to improve a portion of Main street, Hopkinsville street, Main Cross street and Depot street in the City of Greenville.

The City Council of the City of Greenville do ordain as follows:

That the following named streets and portions thereof in the City of Greenville be and they are hereby ordered to be reconstructed for the following distance and in the following manner, to-wit:

Hopkinsville street beginning with and including the property of D. S. Duncan and S. J. Mohon and extending Eastwardly to its intersection with Main street; thence Main street from said intersection to its intersection with Main Cross street; thence still Northwardly to its intersection with Crossbridge avenue; thence from that intersection still Northwardly to its intersection with Depot street; thence with Depot street to the right of way of the Illinois Central Railroad; Main Cross Street beginning with and including the property of the Methodist Episcopal Church South and the Greenville Equitable Tobacco Warehouse Company and extending Westwardly to its intersection with Main Street; thence still Westwardly to its intersection with Cherry street.

Said streets shall be reconstructed at the exclusive costs of the owners of the lots, or parts of lots or lands fronting or abutting or bordering the proposed improvements, to be equally apportioned by the City Council according to the number of front feet owned by them respectively and the costs of said construction as hereinafter set out shall be and constitute a lien on said abutting property as is provided by law.

Said streets and portions thereof shall be reconstructed by having spread upon them crushed limestone of uniform thickness of at least four inches and of a width to sufficiently and properly cover the surface of said streets and portions thereof and shall also be done under the direct supervision of the Street Committee of the City Council and such Civil Engineer and according to such plans and specifications as they may provide.

Said reconstruction shall be done by public contract after due and proper advertising published for two consecutive issues in THE RECORD, which advertisement shall contain the specifications required in doing said work, and the contract for said work of construction shall be let to the lowest and best bidder, he being required to execute bond to the City of Greenville with good and sufficient security, conditioned on the faithful performance of his contract, the City of Greenville reserving the right to reject any and all bids.

Within ten days after the passage, approval and publication of this ordinance the City Clerk of the City of Greenville will cause to be published for two consecutive issues in THE RECORD an advertisement for bids for the work herein required, which advertisement shall contain the plans and specifications for such work, as aforesaid, and pursuant to which the City Council will contract such work as is provided by law.

Adopted August 4, 1913.

J. W. LAM, Mayor.

OREN L. ROARK, City Clerk.

An Ordinance to improve a portion of the pavements on certain streets of the City of Greenville.

The City Council of the City of Greenville do Ordain as follows:

That concrete pavements be made and constructed in front of the property owned by the following persons and on the following streets in the City of Greenville, to-wit: On East Side of Cherry Street C. P. Church, N. E. Lyon and M. D. L. Bennett. On the North Side of Hopkinsville Street, in front of the property of Sam Ree Martin, D. S. Duncan and Will Bethel. On the West Side of College Street, in front of the property of J. W. Allen, Jefferson Belcher, T. F. Drake, B. F. Green, Green-Marks Concrete Company, Robert Bandy, to Depot Street; On the East side of College Street in front of the property of Bud Templeton, Mrs. Sarah Gilstrap, Dallis Moore, Ora Bandy and Mrs. M. E. Bandy, and J. W. McCauley to Depot street; On the North Side of Bank Street in front of the property of E. G. Oates, T. J. Sparks and W. E. Drake; On Main Street in front of the property of Mrs. Lucy Vost, W. A. Wickliffe and wife; On Main Cross Street, in front of the property of John

Coombs, W. C. Jonson, J. F. Rice Depot Street, M. L. Boggess to Main Street.

Said pavements shall be made of good and substantial concrete done in a workmanlike manner and of the dimensions and in the manner provided by the laws and ordinances of the City of Greenville. They shall be built at the exclusive cost of the owner of the property fronting and abutting thereon and the contractor building them and the City of Greenville shall have a lien on the abutting property for the cost of the same as is provided by law.

The owners of said property shall have the option of building said walks and shall be given 30 days from the publication of this ordinance in which to do said work and in the event of their failure to have the same constructed during said time the contract for said construction or any part thereof remaining unconstructed will after the publication of one Notice in the Record be let to the lowest and best bidder as is provided by law, the cost of said construction to be and remain a lien on the abutting property as aforesaid.

Adopted August 4, 1913.

J. W. LAM, Mayor.

OREN L. ROARK, Clerk.

Asthenia.

"Asthenia" means "without strength," and it describes a condition of general debility. Nerve weakness is "neurasthenia," and muscular weakness is "myasthenia"; but the word without any prefix whatever means a general weakness of the system that the sufferer brings into life with him, in infancy a child with asthenia is incapable of prolonged muscular effort. The normal baby screams lustily and kicks vigorously, but the asthenic baby cries feebly, as if fatigued, and nurses with slow and feeble movements.

Such children cut their first teeth late, with a good deal of digestive disturbance; they catch diseases easily, and are slow to stand and walk. The motor apparatus—that is, the nerves and muscles used in moving the body—is not, and probably never will be, capable of much hard work.

In later years, especially during adolescence, life goes more hardily with the asthenic person. His lack of stamina may show itself in any one of a number of ways—among others backache, chorea, weak eyes, weak heart, slowness of wit, poor digestion, or undue fatigue after ordinary exertion. These symptoms all indicate that the asthenic person cannot work or play like other people, but must arrange his life with regard to his constitutional weakness.

Many asthenics are persons of superior intelligence and moral force, and they often offset their physical limitations by an exercise of will. The ability thus to exert the will and to triumph over fatigue marks the difference between them and the neurasthenic or the simple indolent.

The greatest mistake a person of the asthenic type can make is to use his will power in an effort to keep up with normal people in their work and play. He can often hold his own in the battle of life surprisingly well, but he cannot do it by "burning the candle at both ends." Success in life for the asthenic means a careful conversation of all the vital forces from hour to hour.

Protect Your Children's Eyes

THE greatest desire of parents is to see their children well nourished, strong and healthy—physically well equipped to make a success of life.

Yet, how many parents are there who endeavor to protect that most important sense of all—the eyesight of their children by providing the most suitable light for the study hours?

Modern methods of schooling and the necessity for completing their primary education at an early age imposes a severe tax on the eyes during the growing period of life. In many cases this strain weakens the eyes, or results in loss of sight simply because the little ones are compelled to study under a poor or improper light.

Edison Mazda Lamps—the most suitable electric light to study by—for general home use, and furnish it at minimum cost.

Give your children the benefit of this light. We will be glad to advise you as to the most beneficial way to use Edison Mazda Lamps.

IHC Wagons Are Tough

Did you ever notice when one of the wheels of your loaded wagon dropped into a rut or bumped over a stone how the seat springs gave and rebounded, almost throwing you off? That is an indication of the shock and strain that the rigid spokes and axles have to stand whenever the wagon is traveling over a rough road or through a field. IHC wagons

Weber New Bettendorf Columbus or Steel King

take these stresses and strains as a matter of course. From neckyoke to tail board they are built of selected, air-dried lumber, strong and tough, bending to strains but coming back as straight and true as ever when the load is removed. Besides being tough, IHC wagons are light running. The wheels have just the right pitch and gather, and run true. All skids and skein boxes are paired. The running gear is assembled by skilled workmen whose wages depend as much on the quality as on the quantity of the work they turn out. Consequently, IHC wagons are practically all of the same high standard of quality throughout.

Weber and Columbus wagons have wood gears; New Bettendorf and Steel King have steel gears. To learn which IHC wagon is best suited to your work and conditions, write our nearest office for interesting catalogues.

June 5, 1913. W. O. CRAWFORD, Agt.

Local Mention.

Another primary Saturday,
Read the street and pavement
ordinances.

Several persons are taking the
anti-typhoid treatment.

Miss Eunice Woodward, of
Huntsville, Mo., is a guest of Mrs.
E. A. Taylor.

Miss Eunice Johnson, who is suffering
from an attack of typhoid
fever, is now improving.

Mrs. Walton Parker, of Dawson
Springs, has been a guest of Mrs.
Jennie E. Roark for a few days.

Mr. Fred Irvin arrived from
Louisville yesterday afternoon,
driving through in a new 1914 model
Ford touring car.

Buck Kilby says the more shift-
less and improvident the man the
more likely he is to own a second-
hand automobile.

The cooler weather of the past
few days has been exceedingly re-
freshing, and has in a measure made
up for the lack of rain.

Prof. and Mrs. Oscar W. Irvin will
arrive today from Toledo, Ohio,
and will spend their vacation here
with Mr. and Mrs. L. W. Irvin.

The Citizens' party will hold its
primary Saturday, and another large
crowd will be drawn to town, and
to all voting places in the county.

Milliners have begun to design
fall hats and poets are writing
Christmas verse, but the rest of the
world is enjoying the summer weath-
er.

Greenville has fallen in line, and
we will build on streets on the plan
being used wherever you find good
streets—at the expense of the land
owners.

Mrs. W. S. Gossett died at her
home near Earles last Thursday
afternoon, from a complication of
ailments; burial was at East Union
Friday afternoon, and was largely
attended.

Water in the lake is holding well,
but there is a bit of anxiety, as the
demands against the supply are
heavy, and heavy rains will be
needed in the next few weeks, to
keep us going.

The annual convention of Muh-
lenberg county Sunday-schools will
be held here next Thursday and
Friday, the sessions in the Method-
ist church. An excellent program
has been arranged.

Miss Vay Hardwick, of Indianap-
olis, will arrive the first of the week,
for a visit to Mrs. A. E. McCracken.

Madisonville recently voted \$75,-
000 water bonds, and has an offer
at par, but is seeking a better bidder.
The bonds bear 5 per cent. interest.

The tent meeting, at the corner
of College and Trowbridge streets,
is drawing large attendance nightly,
people coming from far and near.
Much interest is being aroused, and
great results are expected.

A light shower about noon Friday
temporarily relieved the situation,
but it was of short duration. Con-
ditions are increasing in seriousness
and many crops are beyond help,
even if it should rain now. Bottom
lands are not suffering so much, and
a good rain soon would help out
greatly.

Stop, Look, Listen!

See that magnificent new mill at
the depot; nothing that equals it in
the state. Have you used the
Quail meal and Bob White flour
they make? If not, patronize home
industry and get the best.
Home Milling Co. Incorporated.

Mr. Robert Hardison received a
telegram Tuesday from Attorney
General McReynolds notifying him
of his appointment as Assistant At-
torney General, his duties in the
Indian land claims department, with
headquarters at Muskogee, Okla.,
where he will report for duty about
the middle of the month. Mr.
Hardison is being congratulated on
his appointment, but we regret to
lose him and his family.

On the 15th inst. important
changes in the parcel post regulation
will take effect, and still there is
room for more. One of the most
needed features is that books, pic-
tures, printed matter be allowed to
be sent; in fact, every sort of mer-
chandise that is mailable should be
forwarded by parcel post.

Mr. Buren Martin has been laid
up from a novel accident; last Wed-
nesday night he kicked a stick from
beneath a window, and was awakened
when the stick caught two of his
toes, removing one nail and causing
considerable pain from lacerations.
Buren says that hereafter he hopes
to do his kicking when awake, when
he can have some selection in the
matter, and make his activities more
effective and less hurtful to himself.

Owners of land are the ones who
should pay for improvements, for
private or public use. We have
caught the swing, and our city
council has passed an ordinance
providing for streets to be construct-
ed at the joint expense of the land
owners each side. It is the only solu-
tion of the problem, as the revenues
of the city are not sufficient to pro-
vide water, lights, police and fire
protection, street cleaning, etc., and
also build the streets.

Miss Lena Arnold asks the patron-
age of the public, and guarantees
that satisfactory work will be done
in her clothes cleaning, pressing
and repairing shop.

THE RECORD \$500 per year.

Democratic Primary Names Can- didates.

Democrats gathered in vast num-
bers at the various voting places in
the county last Saturday, and poll-
ed more than 2,300 votes in the
general contest of party leaders.
There was general quiet everywhere,
not the least disorder occurring.
Some surprises were in store for
even the most astute politicians,
a few of the nominees not being
considered as winners; of course all
the defeated candidates were sur-
prised, as all had greatest hopes.
Following is the ticket as named:
Representative, Ed Frost.
County Judge, J. J. Rice.
County Clerk, Leo Fentress.
County Attorney, W. H. Gray.
Sheriff, Robert Wickliff.
Assessor, Andrew T. Glenn.
Jailer, Chas. W. Stoval.
Superintendent of Schools, Miss
Amy M. Longest.
Coroner, Geo. B. Young.
Magistrates: First district, Bar-
ney E. Roll; second, J. T. Perkins;
third, J. T. Langley; fourth, Wes
Hill; fifth, Andrew J. Browning.
The ticket is well balanced, and
is considered very strong, and there
will be a stiff fight put up for the
victory again in November.

Judge Sandidge Resigns.

Hon. W. P. Sandidge, of Russell-
ville, circuit judge of the Seventh
judicial district, composed of the
counties of Logan, Tood, Muhlen-
berg and Simpson counties, has
sent his resignation to Gov. Mc-
Creary, and will move to Owens-
boro to become a member of the
law firm of Miller, Sandidge &
Malin. The news came as a great
surprise to the people of the dis-
trict, and causes general regret, as
Judge Sandidge is considered one of
the best men on the bench in the
state, and has a host of sincere
admirers everywhere. In his new con-
nection he will yield a large in-
fluence, as his legal talents are of
the highest type, and he will at
once step into a large and varied
practice that will yield much greater
income than the salary he has
drawn. Mr. J. C. Browder, of
Russellville, is being recommended
for the vacancy, the attorneys
throughout the district interesting
themselves in the matter. There
are few better qualified men in the
state for the position, and the Gov-
ernor would not be able to secure a
more competent man.

A Fly Catechism.

The following questions and an-
swers were prepared by the Indiana
State Board of Health and have
been widely copied:

1. Where is the fly born? In
manure and filth.
2. Where does the fly live? In
every kind of filth.
3. Is anything too filthy for the
fly to eat? No.
4. (a) Where does he go when he
leaves the surface closet and the
manure pile and the spittoon? In-
to the kitchen and dining room.
(b) What does he do there? He
walks on the bread fruit and vege-
tables. He wipes his feet on the
butter and bathes in the milk.
5. Does the fly visit the patient
sick with typhoid fever, consump-
tion and cholera infantum? He
does—and he may call on you next.
6. Is the fly dangerous? He is
man's worst pest and more danger-
ous than wild beasts or rattlesnakes.
7. What diseases does the fly
carry? He carries typhoid fever,
consumption and summer com-
plaint. How? On his wings and
hairy feet. What is his correct
name? Typhoid fly.
8. Did he ever kill anyone? He
killed more American soldiers
in the Spanish American War than
did the bullets of the Spaniards.
9. Where are the greatest num-
ber of cases of typhoid fever, con-
sumption and summer complaint?
Where there are the most flies.
10. Where the most flies? Where
there is the most filth.
11. Why should we kill the fly?
Because he may kill us.
12. When shall we kill the fly?
Kill him before he gets wings—kill
him when he is a maggot in the
manure pile—kill him while he is in
the egg state.
13. How? Keep the stables
dry and clean and don't allow any
manure to stay on the premises
longer than one week. Have all
other filth and trash accumulating
on your premises removed or burn-
ed at least once a week.
14. If your neighbor fails to
comply with these rules and allows
flies to breed on his premises to
visit you, screen your doors and
keep them out.

I. C. Officials Here Monday.

Greenville business men met a
dozen or more of the I. C. officials
of the I. C. railroad at the court
house at 11:30 Monday morning,
and for half an hour there was gen-
eral informal talk that may lead to
local improvements. The party
was traveling by special train, and
half a dozen automobiles conveyed
the visitors to town. This is the first
tour of the kind, and is being ex-
tended to every section of the sys-
tem, heads of all departments mak-
ing inspection of the property, and
making calls on patrons at every
station of importance.

Those in the party were: V. D.
Fort, assistant traffic manager; Jos.
Hatendorf, general freight agent;
F. C. Furny, assistant general
freight agent; G. H. Bower, assist-
ant general passenger agent; F. W.
Harlow, division passenger agent;
R. H. Fowler, division passenger
agent; H. L. Fairfield, superintend-
ent; L. W. Baldwin, division super-
intendent; H. S. Gooch, traveling
passenger agent; G. B. James, traffic
manager; L. L. Cofer.

Look, Look!

Weigh your wheat and bring it to
us, and for every bushel of No. 2
we will give you 40 pounds of the
famous Bob White flour the best on
the market.

FRAIL, SICKLY CHILD

Restored to Health by Vinol— Letter to Mothers.

Anxious mothers often wonder why
their children are so pale, thin and
nervous and have so little appetite.
For the benefit of such mothers in
this vicinity we publish the following
letter.
J. Edmund Miller, New Haven,
Conn., says: "My little daughter, ever
since her birth, had been frail and
sickly, and was a constant source of
worryment. Several months ago we
commenced to give her Vinol. I im-
mediately noted an improvement in
her health and appearance. I gave
her three bottles of Vinol, and from
the good it has done her I can truly
say it will do all you claim."
This child's recovery was due to
the combined action of the medicinal
elements extracted from cod's livers,
—combined with the blood-making
and strength-creating properties of
tonic iron, which are contained in
Vinol.
Vinol will build up and strengthen
delicate children, old people and the
weak, run-down and debilitated. We
return the money in every case where
it fails.
G. E. COUNTZLER, Druggist.
